Please check one of the following:

<input type="checkbox"/>	1	Gravity service lateral to an existing sewer cleanout
<input type="checkbox"/>	2	Gravity service lateral to an existing gravity sewer main
<input type="checkbox"/>	3	Gravity service lateral to an existing sewer manhole
<input type="checkbox"/>	4	Gravity service lateral to an existing vacuum pit
<input type="checkbox"/>	5	Gravity service lateral and new vacuum pit
<input type="checkbox"/>	6	Septic tank effluent private pump station to an existing sewer manhole
<input type="checkbox"/>	7	Septic tank effluent private pump station to an existing interceptor force main branch valve
<input type="checkbox"/>	8	Septic tank effluent private pump station to a new interceptor force main tap valve
<input type="checkbox"/>	9	Septic tank effluent private pump station to an existing vacuum pit
<input type="checkbox"/>	10	Septic tank effluent private pump station to a new vacuum pit
<input type="checkbox"/>	11	Private pump station and force main to an existing sewer manhole
<input type="checkbox"/>	12	Private pump station and force main to an existing interceptor force main branch valve
<input type="checkbox"/>	13	Private pump station and force main to a new interceptor force main tap valve

For connection types 1 - 5, please indicate lateral diameter and material:

Lateral diameter (in): _____ Material: _____

For connection types 6 - 13, please indicate force main diameter and material:

Force main diameter (in): _____ Material: _____

For connection types 1-10, a survey plat with the cleanout location and/or locator box and the connection point to the sanitary sewer system is required.

For connection types 5 and 10, the applicant shall be responsible to install the valve pit and associated appurtenances prior to connecting to the public vacuum sewer system. The valve assembly will be installed by Town personnel.

For connection types 11-13, a site plan is required.

Water Meter Information *

Manufacturer: _____

Meter size: _____ Meter Number: _____ (if known)

* The water meter information will be provided by the Town.

If metering will be used for anything other than domestic demand, please describe additional uses below:

NOTE: *Projects calling for sanitary sewer infrastructure within an existing VDOT right-of-way (ROW), must obtain a permit before commencing construction work. The Town of Onancock will not approve connection to the public sewer system without a VDOT permit.*

NOTE: *The Applicant understands and agrees to pay the appropriate sewer and water connection fees before the application is considered or any work done.*

Applicant Name (print): _____

Date: _____

Applicant Signature: _____

For Town Use ONLY:

Connection Charge Information

- The rate for Sewer Connection between 7/1/23 and 6/3024 is \$3,400.00.
